

# Hossain Sany

Full Stack Software Developer

[contact@hossainsany.dev](mailto:contact@hossainsany.dev) | [hossainsany.dev](https://hossainsany.dev) | [github.com/hossainsany](https://github.com/hossainsany)

## TECHNICAL SKILLS

---

**Frontend:** React, Next.js, TanStack Start, Typescript, JavaScript, Tailwind CSS.

**Backend & Database:** Node.js, Express.js, Drizzle ORM, PostgreSQL, MongoDB.

**Cloud & Infrastructure:** Cloudflare, Neon, Git/GitHub Actions, Docker.

**Other:** Sanity CMS, OAuth, Wordpress, VS Code.

## EXPERIENCE

---

### Founder & Lead Developer

*Webexis LLC*

Oct. 2023 – Present

*Sylhet, Bangladesh*

- Lead end-to-end development of custom web applications, marketing sites, and scalable SaaS products for a diverse portfolio of clients, including restaurants, service-based agencies, and digital startups.
- Design adaptable backend architectures, leveraging serverless PostgreSQL (Neon) with Drizzle ORM for complex relational data, and MongoDB for projects requiring highly flexible, document-based schemas.
- Manage full project lifecycles—from initial client consultation and requirements gathering to deployment and ongoing server maintenance—ensuring timely delivery and high client retention.

### Freelance Web Developer

*Upwork*

Jan. 2021 – Aug. 2023

*Remote*

- Designed, developed, and delivered 8+ client projects leveraging Next.js and WordPress architectures, consistently increasing client website traffic by up to 40%.
- Owned full client communication and technical delivery, achieving a 5/5 rating across all contracts by consistently exceeding performance metrics and project deadlines.
- Demonstrated rapid technical adaptability by independently architecting projects with React.js, modern JavaScript, and SASS to solve complex client requirements.

## PROJECTS

---

### EdTech SaaS Platform (Easy IELTS BD)

<https://easyieltsbd.com>

Oct. 2025 – Present

*Sylhet, Bangladesh*

- Engineered a high-concurrency SaaS testing platform from scratch, currently supporting over 1200 active users. Fully responsible for ongoing database maintenance, active feature rollouts, and infrastructure scaling.
- Built a specialized, timed examination environment that mimics official computer-based testing UIs. Implemented robust state persistence during 60-minute mock exams, ensuring zero data loss during network interruptions or browser refreshes.
- Deployed a highly available, cost-effective backend using serverless Postgres (Neon) and Drizzle ORM to prevent database locking during traffic spikes. Utilized Cloudflare for rapid global asset delivery and seamless live updates.

## EDUCATION

---

### Aims Academy

*OTHM Level 5 Extended Diploma in Information Technology*

Expected Dec. 2026

*Sylhet, Bangladesh*

### Aims Academy

*OTHM Level 3 Foundation Diploma in Information Technology*

Jun. 2021

*Sylhet, Bangladesh*

### British Council

*IELTS (Overall Band 7.0/CEFR C1)*

Apr. 2023

*Sylhet, Bangladesh*
